

# EPL App

Compatible with iPhone, iPod, iPod Touch, and iPad. Requires iOS 3.0 or later.

Android compatibility coming soon.

The new EPL app was added September 14<sup>th</sup>, so here are some screenshots to familiarize you with the application as well as answer basic questions you might encounter.

Customers can download the app by going to our website:

<http://www.epl.ca>

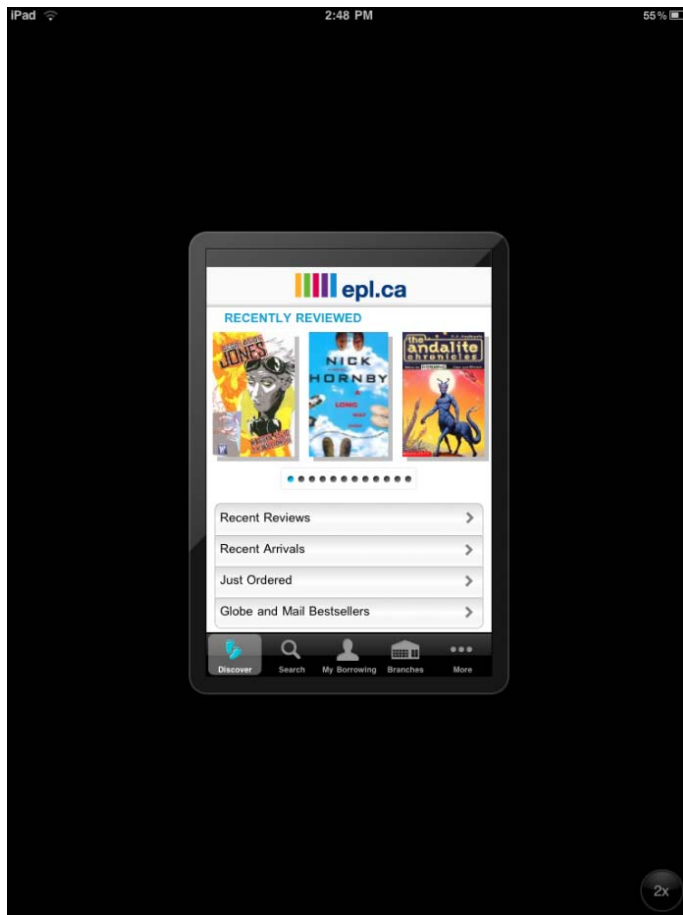

Digital Content → Apps & Mobility → Then click “Get the app now!”

or <http://itunes.apple.com/ca/app/epl-mobile/id390969843?mt=8>

To use the app, once downloaded, customers will need to select it from the desktop:

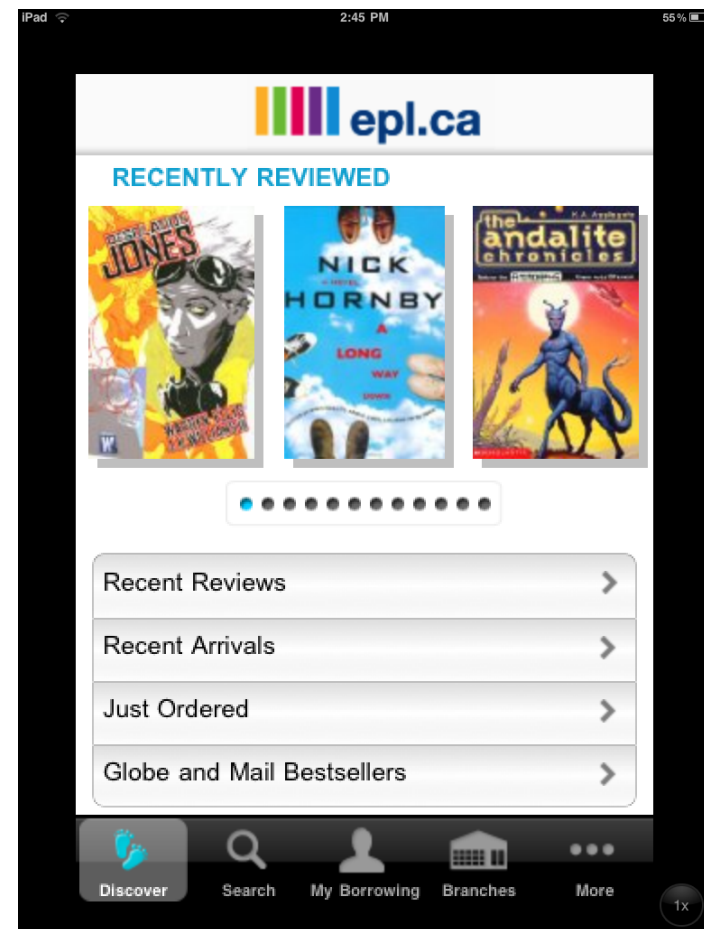

When first opened, the app will appear small if on an iPad, the view can be made larger by clicking the plus sign (+) in the bottom right of the screen. 2x makes the image larger, and 1x returns the image back the original view.

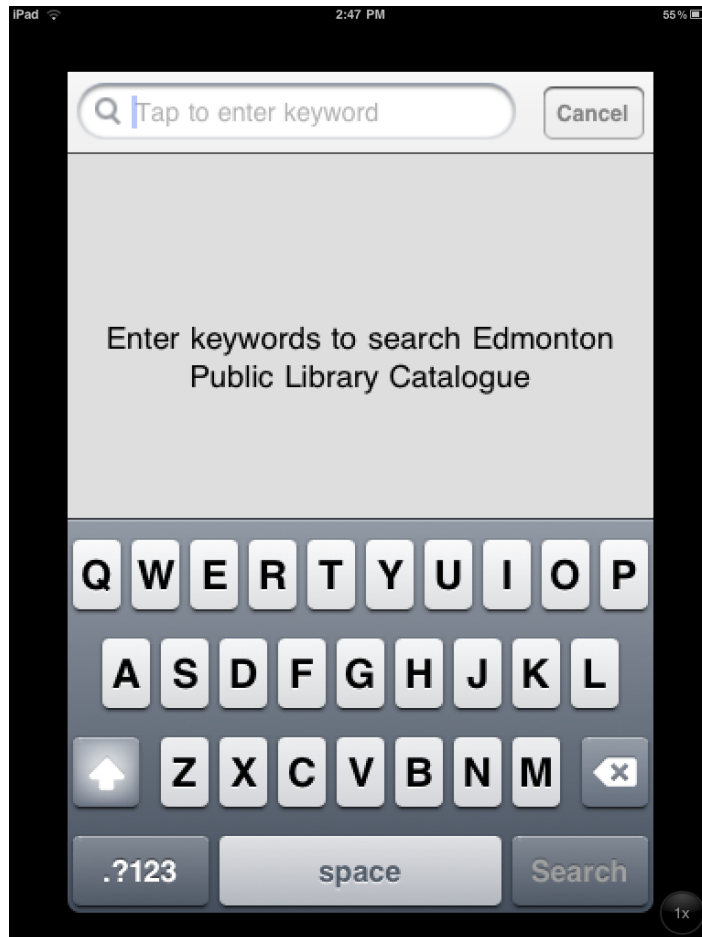

From here, they will be able to see five options along the bottom of their screen: Discover, Search, My Borrowing, Branches and More.

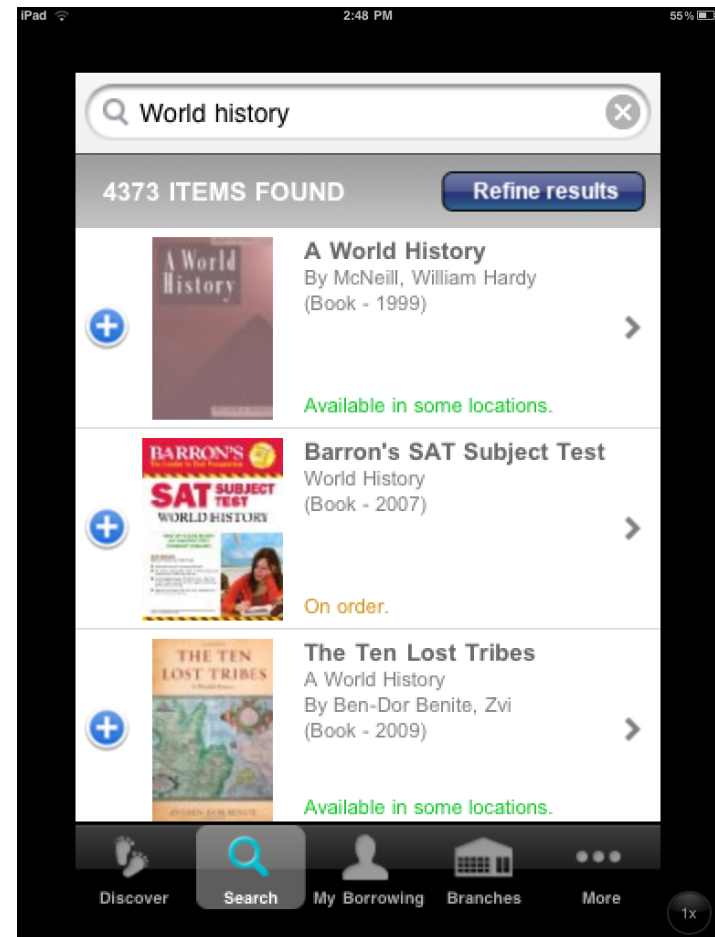

1. **Discover**, will display recent additions to EPL:

2. **Search**, will allow customers to search the EPL catalogue...

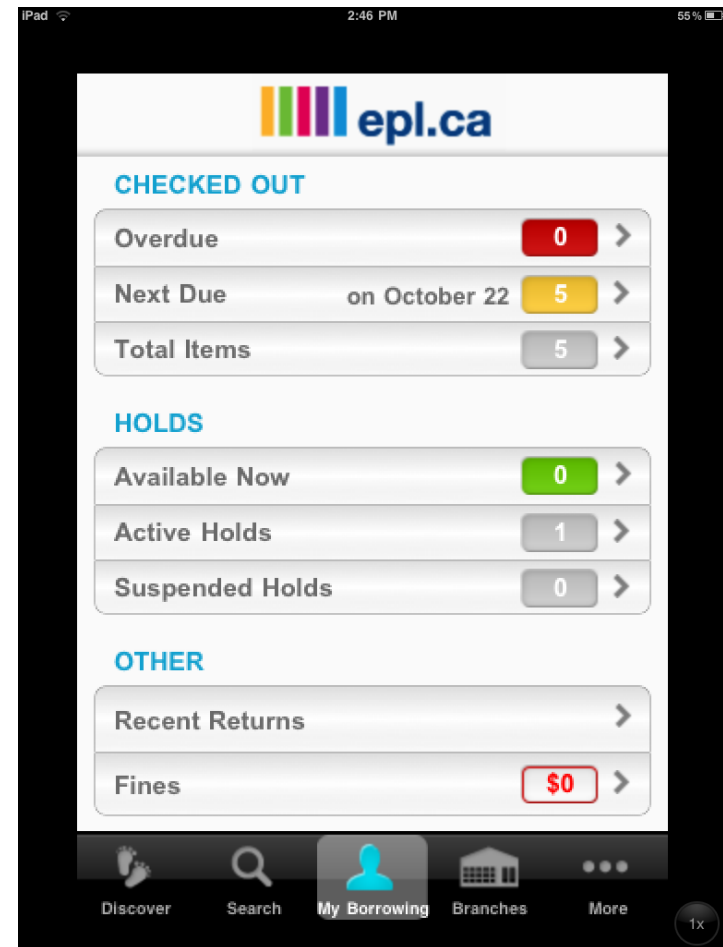

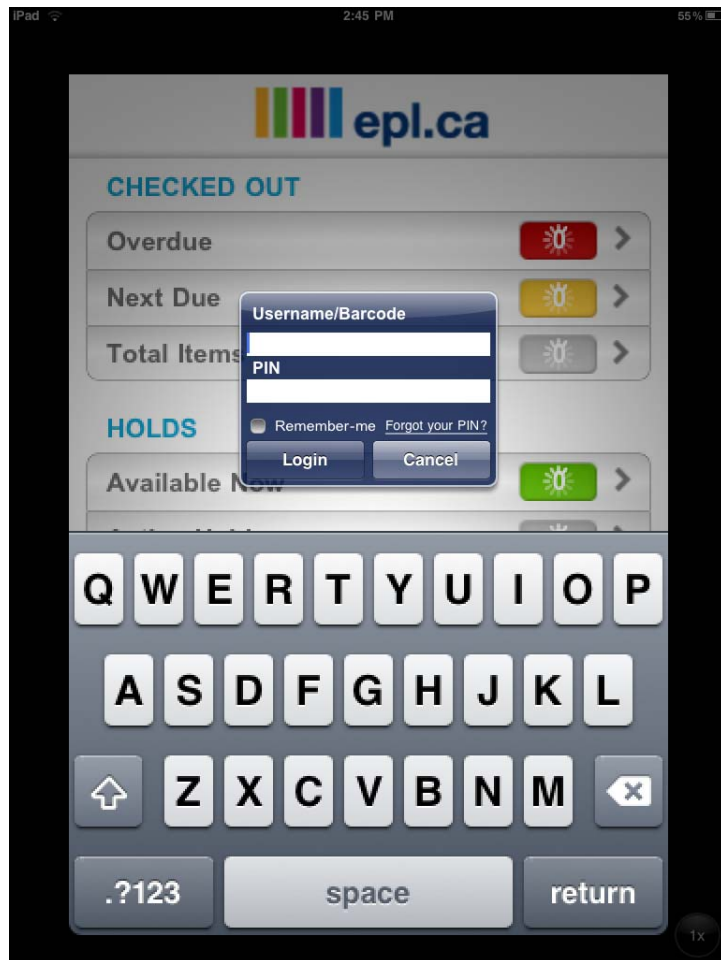

as well as view results.

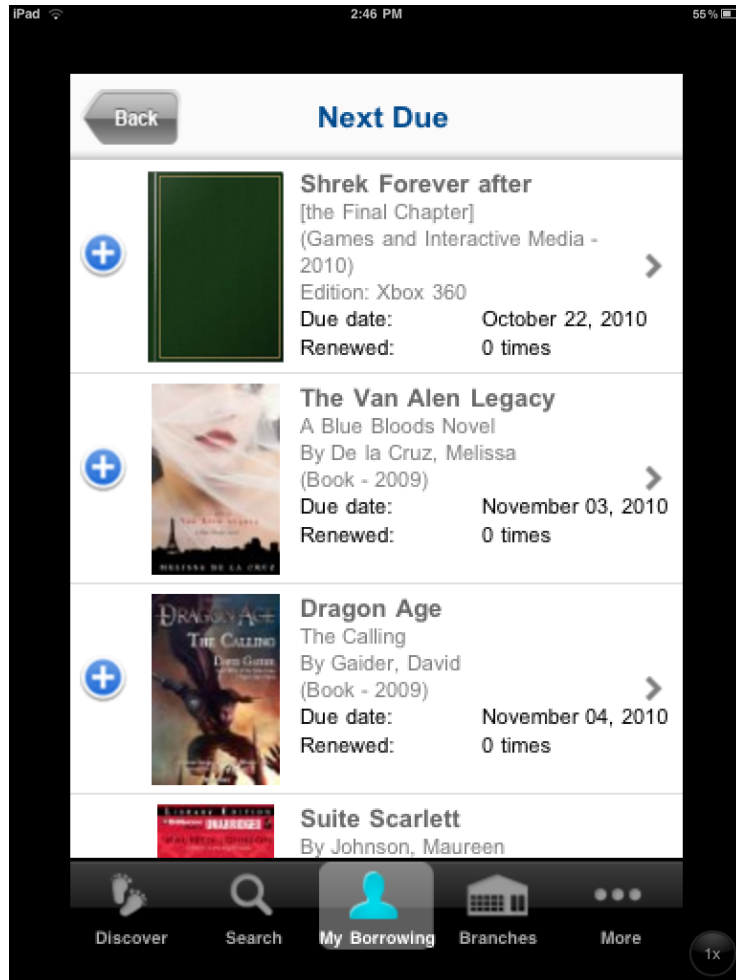

3. **My Borrowing**, will prompt the user to sign in with their library barcode and PIN.

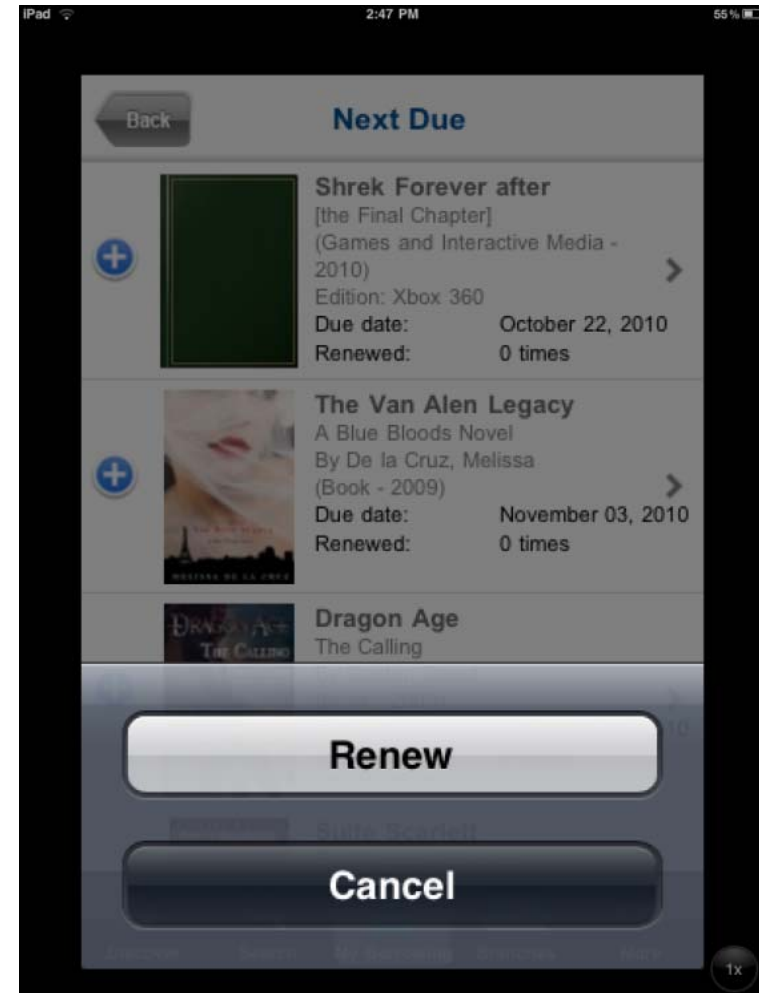

Once this information has been entered, they will be able to view the items they have checked out, their holds and any possible fines. In order to renew an item that is currently checked out, the customer will first need to view their check-outs. To do this, they can select either the number of books checked out or the arrow to the right of the number.

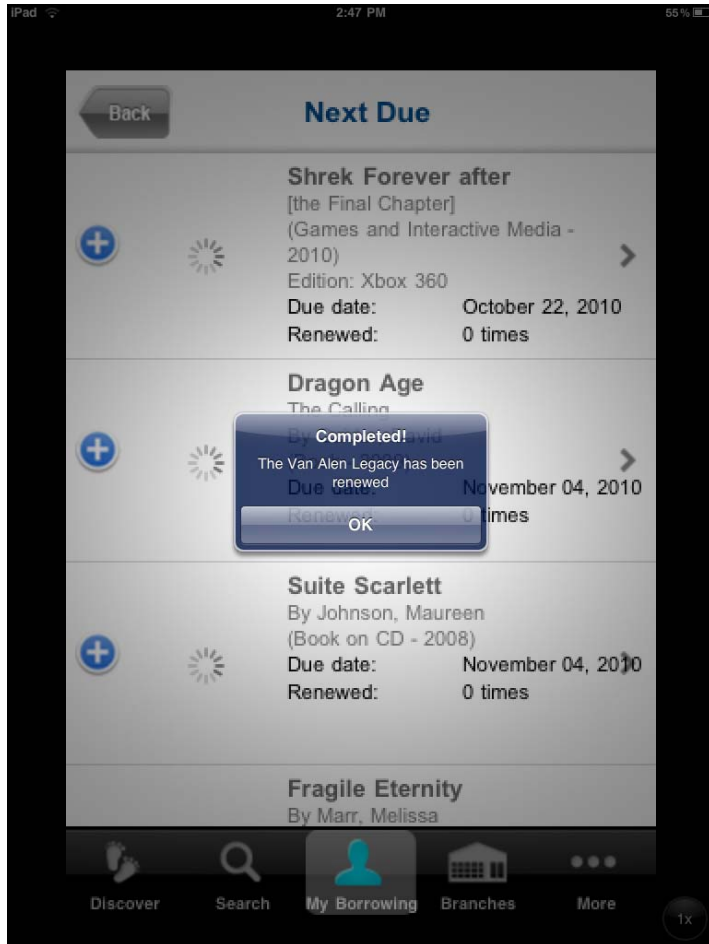

This will populate a list of the items the customer has checked-out on their library card along with due dates and the number of times the item has been renewed.

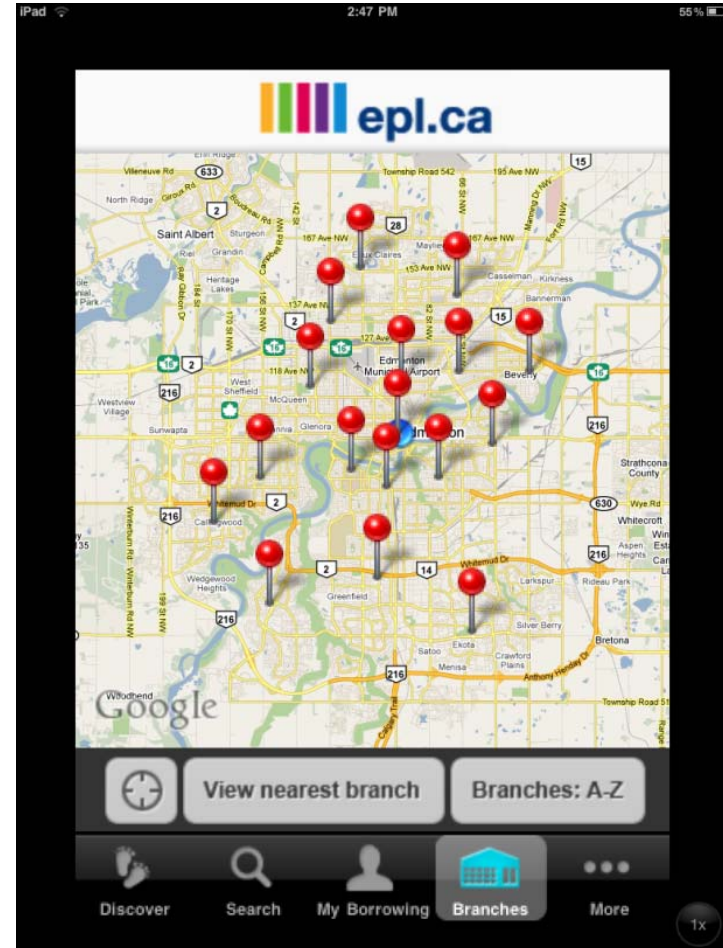

The item can be renewed by selecting the plus sign icon to the left of the title. The option will appear to either renew or cancel.

Once 'Renew' is selected, a confirmation will appear. The customer's item has now been renewed.

4. **Branches**, pulls up a list of EPL branches across the city using Google Maps. From here, the customer may either use one of the buttons at the bottom of the screen to “View nearest branch” or view a list of branches. Or, they may select one of the pins on the map to see specific branch information.

5. **More**, has the terms of use, privacy policy, settings and even a link to the customer's actual barcode which they can scan in place of their library card.
